

# ECO-FRIENDLY MOODBOOK

roskush

H O S P I T A L I T Y

No.W or never ?

Revol is going the extra mile to help conserve its planet's resources, recycling and taking advantage of its industrial waste to dramatically reduce the use of water and primary minerals in its porcelain production. Its aim : to be the first to offer the hotel and restaurant industry eco-friendly products made from recycled ceramic clay and enamels - is now reality.

 ECO-FRIENDLY

CasaRovea is actively taking steps to reduce our carbon footprint, while still maintaining the integrity of the product.

The Eco-Friendly collection uses environmentally friendly natural fibers, such as cotton and linen.

Embracing the need to reduce waste, we have developed this exclusive collection by utilizing yarns that would have been discarded because too short for the weaving of finer linens.

The result is this unique product. Strong enough to hold up in a rigorous hospitality setting and yet soft to the touch and gentle to the eye enhance your guest's dining experience.

# CASAROVEA

## Re:New

*A special recycled product*

Re:New is a product exclusive to CASAROVEA made with a yarn composed of pre-consumption cuttings and plastic bottles.

Pre-consumption cuttings are thread discarded during previous weaving or knitting processes.

The plastic bottles are transformed into threads through a crushing, fusion and spinning process to create yarns that are significantly more sustainable.

Re:New NAPKIN

48% VIRGIN COTTON

26% RECYCLED COTTON. Obtained by pre-consumption cuttings

26% RECYCLED POLYESTER. Obtained by re-use of plastic bottles

# E C C O C R Y S T A L

A close-up photograph of a red cocktail served in a cut-crystal glass. The drink is garnished with a slice of orange and a sprig of fresh mint. The glass is set against a dark, textured background.

## Hospitality Brands USA

With unrivaled clarity that has been certified through strict testing by the ISO, Eco Crystal is 100% recyclable, and thanks to its factory's efforts, is produced in Europe's first co2 negative region.

### Utilizing:

- Solar energy with over 75,000 ft2 of roof reclaimed and Repurposed with solar panels at our factories.
- Biomass Fuel
- Geothermal Energy
- The Purest Raw Materials
